EUROPEAN PARTNERING AWARDS

BBSRC's International Relations Unit (IRU) strives to enhance BBSRC's influence and involvement at the forefront of international science, to exploit international funding opportunities in the interests of BBSRC's scientific community and to capitalise on international links, both at policy and scientific levels. It achieves this through a number of mechanisms.

The European Partnering Awards scheme provides funding for networking and other activities to facilitate UK coordination and participation in consortia for the preparation and development of collaborative research proposals for submission to European Commission funding calls under Horizon 2020.

The first annual call for the European Partnering Awards Scheme was announced by BBSRC in 2013. Typically, awards of up to £20,000 are made over a period of 12-18 months.
5 grants totalling £87,090 were funded following the 2013 European Partnering Awards Call. The full list of awards that have been made by BBSRC is shown below.

Contacts
