BBSRC responsive mode and initiative success rates 2010-11 session

This document shows the success rates for applications to BBSRC for responsive mode and initiative research grant funding from HEIs and institutes of BBSRC over the year April 2010 to March 2011.

The figures have been calculated from all responsive mode and initiative grant applications considered by BBSRC Research Committees and Initiative Panels at meetings held between 1 April 2010 and 31 March 2011.

Success rates are shown by both number and value. The average success rate by number over this year was 28% based on both responsive mode and initiative applications. The overall success rate by value was 26% over the same period.

Grant institution	Responsive Mode and Initiatives				Responsive Mode and Initiatives		
	Number of grants			Success rate by number	Value (£K)		Success rate by value
