Can fuel grow on trees?

A thought provoking workshop enabling secondary pupils to discuss bioenergy and meet real scientists.

Do you want your students to learn more about renewable energy?

This is a chance for your students to meet bioenergy researchers and take part in a fun workshop discussing the future of energy.

Students will get to take on the role of scientists, farmers, businessmen and environmentalists to discover more about how fuel is made from plants.

Suitable for ages 13-19.

13-16th
March 2014

Big Bang Fair,
NEC Birmingham
